

TOGETHER, WE CAN ACCOMPLISH ANYTHING

HIGHLIGHTS

## iCARE about our roads

On Saturday, September 21, 2014 our iCare youth participants pulled together to mend a fissure in the road that spanned over 4 meters and was 13 cm in depth.

### Taking Charge

More than 20 community youth pulled together to fix a break in the road at Parker Paint Junction in Paynesville. The break that was caused by the installation of a pipe on behalf of the Water and Sewer division has caused several injuries, motorbike and vehicle accidents, as well as large unnecessary traffic jams. In many cases, vehicles have driven onto land where local business owners and sellers stand and conduct business. After witnessing the harmful effects and life-threatening traffic flow encroaching on high foot traffic areas, our youth acted.

With backing from Youth Crime Watch Liberia, our youth gathered shovels, a pick axe, wheelbarrows, gloves, and rocks from their fellow community members to get the job done.

### Hard Work

From 6am, our youth began moving from the junction, to football fields and willing

community member's homes, to collect and shovel rocks and stones into barrels, loading them into YCWL's vehicle and bringing them to the junction where they reconstructed the damaged road.

After several trips and hard work, our youth finished their efforts at 3pm.

### Guest Appearances

The Speaker of the Mano River Youth Parliament, Mr. Robert Gboluma also made an inspiring speech to our community youth applauding and thanking them for their initiative as well as giving several inspiring words wishing our youth continued success in their community development efforts.
